6TH Edition

New Space Economy European Expoforum

New Space Economy, was created in 2019 with the scope of becoming the international reference event on the new space economy challenges and perspectives, organized by Fiera Roma.

Three days to discuss and cultivate new connections, to explore new collaborations within the space sector and beyond.

The NSE format consists of an **exhibition section**, an articulated program of contents and insights staged during the 3 days, completed by a rich **networking and b2b program**, and focuses on the ability of the new space economy to give rise, from space, to new markets based on entrepreneurial technological innovation. And these markets experience these days **continuous evolution** and still offer unprecedented opportunities.

With the **6th edition** scheduled on **16-18 December, 2024 in Fiera Roma**, with the support of **MIMIT** (Ministry of Enterprises and Made in Italy), of **ASI** (Italian Space Agency) and of **Lazio Region**, NSE 2024 renews its promises.

In this strategic year, where Italy is at the centre of the global Space Industry and of the Space Related research, **NSE offers an original, end-of-year perspective: a 3 day program to attract innovators, industrial leaders from cross related sectors, all under one roof to promote strategic partnerships, explore disruptive ideas and advanced technologies.**

Presented at MIMIT on 29 May Institutions lead the way

On the **launch of NSE 2024**, presented on 29 May 2024 at the Ministry of Enterprises and Made in Italy, **top protagonists from high rank institutions highlighted the centrality of the new space economy**, and how in this context **a trade fair like NSE is central**, as it represents an important opportunity to promote knowledge and meetings, develop or start activities, intercept the enormous opportunities related to the application of space technology in the diverse terrestrial industry environments.

Presented at MIMIT on 29 May The quotes

"Our ambition is re-launch the civil dimension of the space economy, thus we need the public and diplomatic sides to come together and create the basis: this way we can bring the Made in Italy brand within the space industry, and the new Space Legislation points right in this direction."

Amedeo Teti
Head of
Dept. of
Enterprises
Policies at
MIMIT

Teodoro Valente
President ASI

"We speak so often of space economy as something is really changing today due to a wider access to space of private companies, in many cases from outside the sector. Initiatives like NSE are extremely important to start out new relationships and strategic connections."

Mario Cospito
Diplomatic Adviser of MIMIT Minister

"Our regional industrial Space Economy compound expresses a total of over 300 SMEs and Startups, 23K employees, 5 billion € of yearly turnover. In this we strongly feel the necessity of the creation of a structured system, that enables our enterprises to remain central in all processes, ready for the new European phase that awaits us"

Roberta Angelilli
Vice President, Lazio Region

"The space sector is vital, also for what concerns frontier technology. In the past only public institutions were involved, while private companies are entering the market today."

A woman with dark braided hair is shown in profile, wearing a white VR headset. She is smiling slightly. The background is a blurred trade show booth with a sign that reads "FIERFA ROMA".

On Stage

The mission of NSE is to anticipate and satisfy future needs, guiding the sectors towards new goals of success.

The 6th Edition of NSE continues the path towards the growth and innovation of the new space economy ecosystem.

With an attentive eye on the **developments of the new technologies**, NSE sets out to explore the most promising applications, to underline the importance of a more extended and synergic collaboration between the public and private sectors.

2024
 what
 a Space
 year for
 Italy!

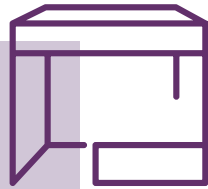

A year that traces a clear path of growth and competitiveness for the Italian Space industry. NSE Expoforum 6th edition – December 2024 from 16 to 18 - provides an opportunity to celebrate the successes of the current year and will also be a launch pad for future programs, consolidating Italy’s leadership on the global Space scene. And also to celebrate the 60th anniversary of the Italian San Marco satellite launch.

NSE 2024

Areas and activities

All the activities of NSE 2024 will take place under one roof, within the extensive and articulated Hall of Fiera Roma. Besides the traditional Exhibition Section, that will host the stands of enterprises, startups, institutions and various organization connected to the wider new space economy sectors, several activities will concur to the completion of the unique NSE experience.

Visit EXHIBITION HALL

Discuss MAIN STAGE

"Our Future, Our Daily Life" is the main theme of the contents presented in the Main Stage of NSE during the 3 days of the event. Institutions, experts and professionals will face the most relevant themes connected with the New Space Economy.

Meet NETWORKING AND B2B

The networking and B2B area, a traditional feature of NSE is conceived to foster ever-new **connections and collaborations** in the space sector and beyond. Animated with the participation of international business representatives and institutions, it represents a **unique opportunity to expand your business actively** contributing to the development of the New Space Economy.

Participate NSE ARENA

The NSE Arena is the corporate presentation area reserved to the demo needs of the exhibitors: centrally located in the exhibition hall, it is conceived as a **dynamic hub** where institutions, companies, researchers and innovators meet to discuss and collaborate on the latest news and challenges of the New Space Economy. **The area includes conferences, workshops, scientific presentations and much more.**

Learn EDUCATION HUB

It is the space dedicated to learning and sharing know-how between companies and institutions of international level. During the three days of the event, this area will be the hub of educational and training activities, aimed at promoting and supporting the growth of skills in the New Space Economy sector. It will host **courses and refresher initiatives** variously aimed and designed, it will be a place for meeting and exchange, contributing to the creation of the professionals of the wider space economy of tomorrow. **Students, experts and enthusiasts will be able to interact in the fair**, with professionals from space related industrial and research sectors, to find at NSE 2024 the ideal, stimulating and collaborative necessary environment.

Closing event

Welcome to NSE 2024

The Scientific Conference of NSE 2023, introduced in the inauguration session by the Minister of Enterprises and Made in Italy Adolfo Urso, was at the center of the intense program as well as the exhibition area, where key actors from the space industry, innovation and research animated the 3 days.

From NSE 2023 Report

During NSE 2023, the debate among the players has shown, once again, results, potential and urgencies related to the new space economy.

With forty focus panels, engaging over **two hundred international speakers**, exhibitors were also able to take advantage of a **business agenda** to get in touch with relevant investors and buyers.

Emerging countries of the African continent and Northern Europe were particularly represented.

Great attention was also paid to Latin America, for the role that Italy plays here as their bridge to Europe.

In the final panel, tackling the **vision of the national strategy**, the need emerged to expand what is today the political and national governance of space to adapt it to the global European and international challenges. This would mark a real **epochal change in the approach to space activities**. NSE confirms to be the place where all these themes can be successfully discussed.
